Fully Automatic Ceramic Insert Plating Machine

Overview

Full-scale automated systems that handle every stage of plate manufacturing—from raw material mixing to final packaging—ensuring maximum efficiency and consistency. Uses a rapidly rotating disc to evenly distribute ceramic material into a flat, circular plate shape via. The S1 is the perfect solution for businesses looking to optimize their manufacturing processes and increase output. The entire process operates autonomously, encompassing every stage from automated clay feeding and precise cutting to the final unloading on the conveyor table or board without any. From robotics to workstations, SIFCO ASC designs customized plating systems to electroplate or anodize localized areas on components. We provide full turnkey solutions that fit seamlessly into your operation. Our design/build services allow us to bring to our users not only standard configurations but a full range of custom process systems. Based on proven WMV centrifuge technology and WMV automation processes, you can now obtain all systems for your complete process chain from a single source – and exploit the full optimization.

Article Content

Palm Technology

Palm Technology designs, fabricates, and installs fully automated plating lines engineered for long-term performance in the demanding conditions of modern plating environments.

Plating Equipment | ReynoldsTech

Our systems are available from simple manual units to fully automatic multi-tasking units operating in a mini-environment. All of our plating systems can be equipped

Automated Plating Systems

From robotics to workstations, SIFCO ASC designs customized plating systems to electroplate or anodize localized areas on components. We provide full turnkey

Injection moulding machine for overmoulding inserts

The CC300 is an innovative machine control system with modern operating logic, self-explanatory navigation and individual configuration options. Robots and peripherals are fully integrated. The

Fully Automated System for Automatic Plating Machine

Our Automatic Plating Machine ensures precision with its standout feature—consistent, high-quality coating at 500 units per hour. We offer tailored

Top Quality Ceramic Plate Machines for Efficient Production

Full-scale automated systems that handle every stage of plate manufacturing—from raw material mixing to final packaging—ensuring maximum efficiency and consistency. Uses a rapidly rotating disc to

Electroplating systems

By combining WMV engineering and UAS Galvano expertise, we are taking the entire electroplating process to a new level. Our expertise in automation and

Automatic Ceramic Forming Line,Plates, Cups, Mugs

This fully automatic ceramic tableware production line integrates pug mills, clay cutting, forming, drying, demoulding, and edge trimming into one continuous

How Our Automatic Ceramics Manufacturing Machines

Our automatic ceramic forming machine uses advanced mold technology and PLC program control system to achieve a significant improvement in molding

© 2026 PROMETHEAS OPTICAL - All rights reserved

Plating surface treatment equipment manufacturer

Plating machine manufacturer -, CRAY is a hi-tech enterprise that is professionally engaged in development, design, manufacture, sale and

Yuncheng Hongjian Technology Development Co., Ltd.

HJ Fully Automatic Electroplating Line is developed on the designers'' rich experience and CNC technology. The single tank is with PLC and display

What is Insert Molding? The Complete Design Guide

What is Insert Molding? Insert molding is a sophisticated manufacturing process where a pre-formed insert, typically made of metal, plastic, or ceramic, is placed

Custom Automatic Glaze Dipping Machine for Ceramic Glazing

Factory direct sales, providing custom solutions. This glaze dipping machine can glaze the whole ceramic product inside and outside at

Insert Molding and Insert Molding Machines: Process,

What is the size and complexity of the insert part? Does your application require high-speed or precision placement? Is vertical clamping

MPI 56 Series C-Frame Semi-Automatic Injector

MPI 56 Series C-Frame Semi-Automatic C-Frame Ceramic / Abrasive Slurry Injector The MPI 56 is engineered specifically for operation with thick viscosity, abrasive

NS Ceramic Machinery

S1 ceramic presses are fully automatic equipment that offer unparalleled production rates that are both efficient and consistent. Unlike traditional production methods,

Electroplating Machine

Discover electro plating machines for metal finishing with automatic control, PP/SS tanks, and PLC systems. Ideal for nickel, chrome, gold plating.

Gold Plating Machine For Jewelry

Gold Plating Machine For Jewelry Buying a Gold plating machine today is definitely not an easy task. There is a range of options available today, aimed both at hobbyists and professionals. One could
